

CHANNEL®

CANTILEVERED SHELVING

Channel's cantilevered shelving options offer a durable, heavy-duty and sophisticated solution for your storage applications.

IMAGE SHOWS FOUR DIFFERENT SHELVING STYLES: SOLID, TUBULAR, E-CHANNEL AND T-BAR

- Heavy-duty, Heliarc, all-welded, high tensile strength, extruded aluminum construction: **Built to Last.**
- Lifetime guarantee against rust.
- Space saving cantilevered design increases shelving capacity and allows easy, unobstructed access to corner storage.
- Available in four shelving styles: Solid, Tubular, E-Channel or T-Bar.
- Standard shelf depths are 20" and 24".
- Standard widths are 36", 42", 48" 54" and 60".
- Can be used as individual, free standing units; or assembled in "runs" using common support uprights.
- Shelf spacing is adjustable in 10" vertical increments.
