RAK PORCELAIN USA

RAK Porcelain **specializes in the designing, manufacturing, and supply of exquisite quality porcelain tableware, catering to the world.** Headquartered in the United Arab Emirates, our production facility spans over 100,000 square meters, equipped with state-of-the-art machinery capable of producing 28 million pieces of high alumina dinnerware and top shelf accessories annually. Our core operable divisions are situated in Luxembourg, Pennsylvania, and the UAE, which gives us a robust distribution network spanning 5 continents, where we reach over 165 countries. The company's easy to reach distribution strategy has resulted in partnerships with leading hotel chains, world class restaurants and business giants of the catering segment.

Being one of **the fastest growing porcelain tableware enterprises, our products already serve as a canvas for chef creativity in more than 40,000 starred hotels, international airlines, premium cruise lines, convention centers, stadiums, etc.,** who proudly endorse us in various segments of our industry.

RAK Porcelain USA, located in Oakdale, PA, has been serving America's tabletops for over 15 years. We offer a **wide range of collections**, including award-winning dinnerware, flatware, and glassware. Our mission is to passionately strive to attain excellence in local business operations and beyond and raise the standards of our customer's expectations and deliver beyond that standard. Dinnerware is our specialty. All our products are extremely durable, due to an extremely high alumina body. The best part is that we produce dinnerware with extremely high yields, which means a **very affordable price** point for the end user. Our wide range of patterns offers a rainbow of aesthetics. Our custom decorating capabilities are unlimited. If you can image it, chances are RAK Porcelain can create it just for you.

While RAK Porcelain's existing cutlery collection compliments our dinnerware and glassware, we are happy to announce that **RAK Porcelain is partnering with Sola the Netherlands**, where we get to introduce their **unique designs** to the U.S. market for the very first time.

RAK Porcelain is creating a **natural addition** to its range of hotel dinnerware by launching a range of flatware **based on detailed observations of the needs and expectations of the hotel industry worldwide.** This flatware features the same characteristics as those contributing to the success of RAK Porcelain.

This is a guarantee of optimal **quality and functionality.** The strongest stainless steel (AISI 304) has been used, containing 18% chrome which ensures excellent resistance to oxidation, and 10% nickel to increase the material's food neutrality. This flatware is between 3 and 4 mm thick, making it outstandingly sturdy and ergonomic. This excellent material gives free rein to the designers' creativity in both form and design.

RAK PREMIUM FLATWARE

BAGUETTE | 18/10

A mirror finish provides timeless chic, and the ergonomics perfectly fits the palm of your hand, revealing an ideal balance of design and comfort.

VINTAGE FINISH FLATWARE

Sola's Vintage finish gives any 18/10 pattern a rustic feel and appearance. Some also refer to it as a "farm to table" look, a satin look, or a burnished appearance. Either way, it fits into many casual or country environments.

CARE AND HANDLING STAINLESS FLATWARE

To retain a quality product, please follow the process below:

Presoak

- Remove all food particles before soaking. Presoak in plastic tubs only. No aluminum or metal soak tanks!!
- Make sure presoak product is totally dissolved before placing flatware in presoak tub.
- Use presoak amounts suggested by manufacturer of your detergent.
- Do not use presoak containing silver de-tarnishing agent.
- Ideally, flatware should remain in presoak for only 10-15 minutes.
- This is stainless steel, not stainproof steel. This is a big difference. Flatware needs to be handled appropriately.
- Bad care practices will affect aesthetics!!
- Change presoak frequently. Chemicals can break down and residue accumulates and may cause harm.

Rinsing

- If you have extremely hard water, a water softener is recommended.
- Make sure flatware in cylinders is loosely packed to allow air drying.
- Shake flatware racks to remove any water.
- To minimize spotting, the sooner the flatware dries, the better your flatware will look.

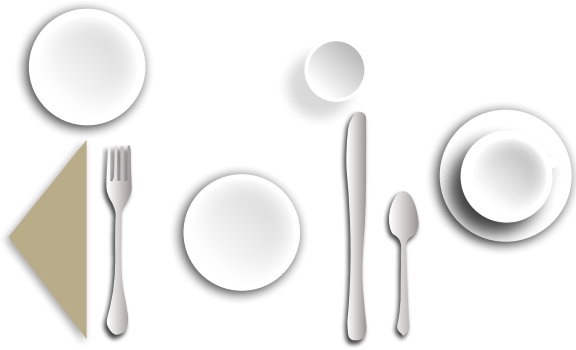

Washing

- After pre-soaking, immediately load flatware loosely into vertical cylinders.
- Put different flatware pieces together in vertical racks to minimize nesting, which can affect how clean your flatware will be.
- There is no need to use flat dish racks for flatware in your dish machine.
- Flat racks allow significant spotting to occur and serve no sanitation purposes, with improper draining.
- Check dishwasher temperature twice daily, and make sure it is above 130 degrees.

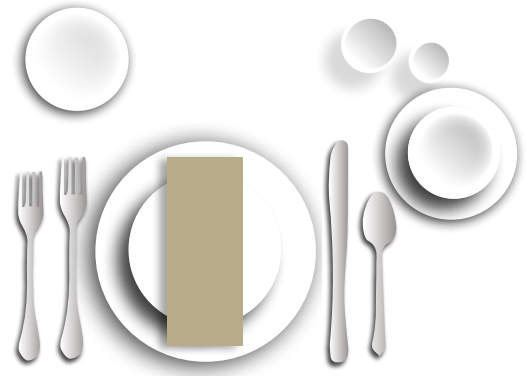

Storage

- Always keep stainless flatware in a dry area.
